

ANNUAL REPORT 2021

(January-December 2021)

KRISHI VIGYAN KENDRA, DEOGARH, ODISHA

Odisha University of Agriculture and Technology

ANNUAL REPORT 2021 (January 2021 to December 2021)

1. GENERAL INFORMATION ABOUT THE KVK

1.1. Name and address of KVK with phone, fax and e-mail

Address	Telephone		E mail
	Office	FAX	
Krishi Vigyan Kendra, Deogarh	06641-	-	kvkdeogarh.ouat@gmail.com
Near Horticulture Farm,	295265		
At/Po-Purunagarh,			
Dist-Deogarh, Pin-768119			

1.2 . Name and address of host organization with phone, fax and e-mail

Address	Т	elephone	E mail
	Office	FAX	
Odisha University of Agriculture & Technology, Bhubaneswar	0674- 2562509	-	deanextension_ouat@rediffmail.com deanextensionouat@yahoo.com deanee@ouat.nic.in

1.3. Name of Senior Scientist and Head with phone & mobile No.

Name	Telephone / Contact				
	Residence	Mobile	Email		
Dr. Sujit Ku. Nath	Deogarh	9437360866	kvkdeogarh.ouat@gmail.com		

1.4. Year of sanction of KVK: 2006

1.5. Staff Position (as on 1st Jan, 2022)

Sl. No.	Sanctioned post	Name of the incumbent	Designation	Discipline/	Pay Scale with present basic	Date of joining	Permanent/ Temporary	Category (SC/ST/ OBC/ Others)
1	Senior Scientist& Head	Dr. Sujit Ku. Nath	Senior Scientist & Head	Agriculture Extension	22320-39100 AGP- 8000	17.05.2018	Permanent	General
2	Subject Matter Specialist	Sri Laba Soren	Scientist	Plant Protection	15600 – 39100 AGP-6000	24.12.2009	Permanent	ST

			promoted through training programmes.	apiculture promotion. KVK is coordinating in supply of units and training.
			Replacement of local greengram variety	Virat variety of greengram is takenup in our seed production programme.
			Intercropping in fruit orchards to be encouraged along with	In KVK instructional farm, intercropping in fruit orchards is demonstrated as well as in WADI project of NABARD.
			automation	
			IFS should be popularised in the district	KVK is working with watershed and other depts for promotion of IFSs in the district.
			Trellies system popularisation in gourds	After our OFT &FLD programme, OLM has taken up trellies system in gourds in larger scale.
			Kharif onion should be emphasized	
			Subhra variety of sesame to be popularised	It will be taken up after availability of seeds from AICRP, Sesame
			Compilation of success stories should be done in KVK.	Compilation of success stories is continuing.

PROCEEDINGS OF THE 17th SCIENTIFIC ADVISORY COMMITTEE MEETING OF KRISHI VIGYAN KENDRA, DEOGARH

The 17th Scientific Advisory Committee (SAC) meeting of KVK, Deogarh was held at 10.30 AM on dt. 01.12.2021 in the training hall of KVK under the chairmanship of Prof. P.J. Mishra, Dean Extension Education, OUAT, Bhubaneswar. Dr.M.P.Nayak, Joint Director(information), OUAT, Bhubaneswar was also present in the meeting as the cluster head of the KVKs of the zone. The meeting was organised both in physical and virtual mode keeping the COVID guidelines in mind. At the outset, Senior Scientist and Head welcomed the chairman, invitees as well as the members of the SAC meeting and briefed about the objectives of the meeting. He also highlighted the mandates and functioning of the KVK and continued the meeting as per the agenda.

Agenda 1: Approval of the proceedings of last SAC meeting

The Senior Scientist and Head stated that the proceedings of the last SAC meeting was circulated to all the members vide letter no 19. He also presented the action taken report on the recommendations of last SAC meeting as follows.

Sl.	Recommendation	Action taken
1	Promoting sweet potato &	OFT has been taken in bhukrishna&bhusona in kharif
	custard apple in the district.	programme. ICAR-CHES is requested to provide Arka
		Bikram variety custard apple for FLD programme.
2	Apiculture to be promoted	Rearing of honey bee is included in SCSP programme.
	through training	District OLM is taking up apiculture promotion. KVK
	programmes.	is coordinating in supply of units and training.
3	Replacement of local	Virat variety of greengram is takenup in our seed
	greengram variety	production programme.
4	Intercropping in fruit	In KVK instructional farm, intercropping in fruit
	orchards to be encouraged	orchards is demonstrated as well as in WADI project of
	along with automation	NABARD.
5	IFS should be popularised in	KVK is working with watershed and other depts for
	the district	promotion of IFSs in the district.
6	Trellies system	After our OFT &FLD programme, OLM has taken up
	popularisation in gourds	trellies system in gourds in larger scale.
7	Kharif onion should be	Kharif onion is included in our FLD programme this
	emphasized	year
8	Subhra variety of sesame to	It will be taken up after availability of seeds from
	be popularised	AICRP, Sesame
9	Compilation of success	Compilation of success stories is continuing.
	stories should be done in	
	KVK.	

After a brief discussion on the action taken report, the proceeding of the last SAC meeting was approved.

Agenda 2: Achievements during the year Rabi-2020-21 and Kharif 2021-22

The Senior Scientist & Head presented the achievements made by KVK during the year Rabi-2020-21 & Kharif- 2021-22

On Farm Testing:Results of 07 OFTs conducted involving 56 farmers during the period to solve location specific problems were presented by the Senior Scientist and Head.

- An OFT was taken on assessment of PGR application for regular bearing in mango where two treatments were taken. First treatment (TO₁) was Application of Ethephon 5 to 8 sprays @ 200 ppm fortnightly interval & TO2 was application of paclobutrazol 1.0 ml/meter canopy diameter. In case of TO₁ number of flowering shoot/branch was found to be 70.00 as compared to 68.48 in FP(farmers not applying any hormone). In TO₂ number of flowering shoot/branch was found to be 77.93.As the current year was a positive year for mango production, the result was not appreciated by the farmers.
- Assessment of IPM module for management of fruit sucking moth in sweet orange was taken as the usual farmers practice of burning the fire in evening. TO₁ was foliar application of neem oil(1%) at 10 days interval& TO₂ was poison bait and field sanitisation. In TO1 and TO2 percentage of infestation was reduced to be 16% and 10% as compared to 22% in FP.As the infestation was not controlled as per the farmers satisfaction, it was proposed to continue it again.
- An OFT was taken on assessment of IPM module for management of shoot gall psylla in mango. The(TO1) was pruning of egg bearing leaves during march last week and pruning of shoots up to 30 cm which bears gall during September &TO₂ was spray Profenophos 50% EC and Dimethoate 30% EC @ 2ml/lit during middle of August against the farmers practice, as no control measures taken. In TO1 and TO2 percentage of infestation was reduced to be 17% and 11% as compared to 25% in FP.
- Two treatments were taken in the OFT on nutrient management for blossom end rot in tomato i.e foliar application of CaCO3(0.5%)(TO1) and Use of AMC(10-20g/litre)(TO2)against the farmers practice (Use of NPK only) average yield of fruit per plant was found to be 5.33kg and 5.28 kg as compared to 4.52 kg in FP. BER percentage was reduced to 15% and 18% respectively.
- OFT was taken on substitution of long duration rice variety Pooja in kharif, where in TO1 was Mrunalini and in TO₂ was Pradhandhan during kharif 2021-22. Crop was in harvesting stage during the reporting period.
- An OFT was taken on assessment of sweet potato varieties for Deogarh district. CTCRI developed two varieties, orange fleshed (Bhu Sona) and purple fleshed (Bhu Krishna) were taken against the existing nail kandamula. Crop was in pre-harvesting stage.
- In assessment of IPM module for management of a new insect in rice i.e panicle mites. Two treatments were taken.TO1 was Spraying of Diafenthiuron 50% SC@ 2g/lit at PI stage & TO2 was Spraying of Milbemectin 1 EC@ 1ml/lit+ Propiconazole 25 EC@ 1 ml/lit at PI stage. Crop was in pre-harvesting stage.

Frontline Demonstrations: Results were presented of 09 FLDs conducted during rabi 2020-21 and Kharif 2021-22 involving 110 farmers in participatory mode.

- Integrated crop management practices in litchi was demonstrated in Kala, Khajurianali and Kureibahal village. Yield was increased to 30% over farmers practice. Less fruiting was recorded due to sudden climatic change.
- IPM module for management of fruit borer in litchi yield was increased to 26.6% over FP and percentage of infestation was reduced to 9% over FP.

- IPM module for management of tea mosquito bug in cashew nut was taken under FLD programme, where yield was increased to 13.5% over FP and percentage of infestation was reduced to 11% over FP.
- In demonstration on bunch feeding in banana yield was increased to 15% over FP and bunch wt. was increased to 18.5 kg as compared to 15.5 kg in FP.
- FLD on ginger var. Subhada was taken during kharif 2021-22. Crop was in Pre-harvesting stage. Many plants died due to wilting and heavy rainfall as per the farmers feedback.
- Demonstration programme was taken on high yielding onion variety in kharif (Agri found dark red). Crop was in pre-harvesting stage. Nursery management and drainage during continuous rain period was a major problem.
- High yielding variety of spine gourd var. ArkaNeelanchal Shree was taken in FLD programme and the crop was in vegetative stage.
- FLD on collar rot management in ground nut was taken where yield increased over FP was 26.2% and percentage of infestation reduced to 16%.
- FLD programme was taken on management of fruit flies in pointed gourd where yield increased over FP was 17.3% and percentage of infestation reduced to 8%.
- **Training:** During the year Rabi 2020-21, 36 nos of farmers and farm women training programme were conducted involving 900 nos farmers,3 nos of rural youth trainings involving 45 farmers and 3 nos of in-service personnels training programme were conducted involving 30 nos of farmers. During the period Kharif 2021-22, 18 nos of farmers and farm women training programmes involving 450 farmers,4 nos of rural youth training programmes involving 60 farmers and 3 nos of in-service personnels training programmes involving 30 nos. of farmers were conducted.
- **Other Extension Activities:** KVK has a organised 116 other extension activities during year 2020-21 involving 1850 nos. of farmers & 85 nos of other extension activities during the year kharif 2021-22 involving 560 nos. of farmers for technology dissemination.

Agenda 3: Action Plan for 2022-23

The Senior Scientist and Head placed the Action Plan for 2022-23 before the scientific advance committee. Detail discussions were made on action plan.

OFTs to be conducted

- ✓ Assessment of sweet potato varieties for Deogarh district.
- ✓ Assessment of herbicides for weed management in kharif tomato
- ✓ Assessment of IPM module for management of fruit sucking moth in sweet orange.
- ✓ Assessment of fall army worm management in maize,
- ✓ Assessment of of tobacco caterpillar management in cauliflower.

FLDs to be conducted

- ✓ Demonstration of medium duration rice variety in kharif cv. Prativa.
- ✓ Demonstration of linseed cv. Arpita in rice fallow.

- ✓ Demonstration of ginger var. Subhada.
- ✓ Demonstration of preemergence weedicides in onion.
- ✓ Demonstration of production of healthy tomato seedlings in pro tray
- ✓ Demonstration of marigold variety Bidhan marigold-2.
- ✓ Demonstration of nmanagement of early blight in potato.
- ✓ Demonstration of management of fruit borer in spine gourd.
- ✓ Demonstration of management of whitefly in pointed gourd.
- ✓ Demonstration of management of fusarium wilt in chilli.
- ✓ Demonstration on INM in tomato.
- ✓ Demonstration on biofertilizer consortia application for yield enhancement in cowpea.

A total of 36 nos of farmers and farm women, 6 nos of rural youth and 10 nos of inservice personnels training are to be conducted during 2022-23.

Agenda 4: Constraints of the KVK:

Senior Scientist and Head presented the constraints faced by the KVK for smooth implementation of KVK activities.

Delaying of filling up of the post of scientists and section officer affects the technical i) and administrative work of the KVK.

Agenda 5: Suggestions of Hon'ble Members and Chairman, SAC:

- 1. ADH suggested to promote coriander in open field condition in the district and to conduct training on sweet orange cultivation.
- 2. CDAO suggested to conduct trial on cotton and to promote suitable pulse variety for rabi season.
- 3. AGM,NABARD suggested to promote spawn unit, multi commodity processing unit, value addition of tomato and tamarind in the district. Climate resilient technology need to be kept in action plan.
- 4. PD, Watershed emphasized for IFS development and to conduct convergence meeting with
- 5. District fisheries officer suggested to appoint fishery scientist in KVK.
- 6. LDM suggested to assist OLM in promoting roadside marketing hub or outlet in the district.
- 7. Secretary CSDR,NGO suggested to promote tomato processing unit and to conduct a buyerseller meet in the district.
- 8. Joint Director(Information), DEE, OUAT, Bhubaneswar told to make a orchard based IFS model in KVK campus in convergence with ATMA. Inter institutional workshop or hybrid mode training on litchi and sweet orange to be done.
- 9. The chairman SAC, DEE, OUAT, Bhubaneswar emphasized on pond based, animal based, orchard based IFS model. Success stories of farmers to be circulated to all district officials.

The chairman in his presidential remarks thanked all the members and special invitees and urged cooperation from all line departments for benefit of farming community of the district.

<u>LIST OF 17th SCIENTIFIC ADVISORY COMMITTEE MEMBERS OF</u> <u>KVK, DEOGARH 2021-22</u>

Sl. No.	Name	Designation & Address
1.	Dr. Pawan Kumar Agrawal	Vice-Chancellor, OUAT, Bhubaneswar & Chairman, SAC meeting
2.	Prof. P. J. Mishra	Dean, Extension Education, OUAT, Bhubaneswar & Cochairman, SAC meeting
3.	Dr. M. P. Nayak	Joint Director (Info), Dean Extension Education, OUAT
4.	Sri Lokesh Pradhan	PD, DRDA, Deogarh
5.	Dr. Govind Acharya	Director, ICAR-CHES, Bhubaneswar, Member
6.	Sri Devesh Behera	AGM, NABARD, Sambalpur, Member
7.	Sri Balakrushna Gauda	CDAO, Deogarh, Member
8.	Sri Antaryami Sahoo	ADH, Deogarh, Member
9.	Dr. Nimai Ch. Pattanaik	CDVO, Deogarh
10.	Sri Narottam Naik	DFO, Deogarh
11.	Sri Sudhakar Satapathy	PD, Watershed, Deogarh
12.	Sri Bhima Ch. Majhi	LDM, Deogarh
13.	Sri Bishnu Ch. Bhoi	DMOAIC, Deogarh
14.	Smt. Smaranika Mohapatra	DPM, OLM, Deogarh
15.	Sri Ramesh Kumar Patel	GM, DIC, Deogarh
16.	Miss Sangita Minz	FA, ADS, Deogarh
17.	Sri Ashok Ku Panigrahi	Secretary, SARC NGO, Member
18.	Sri Arjun Ku Sahu	Secretary, RCMS Ltd., Member
19.	Smt. Rita Rani Rout	Secretary, CSDR, NGO, Deogarh
20.	Smt. Sukumari Sahu	Farmer representative, Kailash, Member
21.	Sri Purandhar Sahu	Farmer representative, Hinjilita, Member
22.	Sri Nabaghana Sahoo	Farmer representative, Deogarh, Member
23.	Sri Babaji Behera	Farmer representative, Kirtanapali, Member
24.	Dr. Sujit Ku Nath	Senior Scientist and Head-cum-Member Secretary

$2.a. \ District\ level\ data\ on\ agriculture,\ livestock\ and\ farming\ situation\ (2021)$

Sl.	Item	Information
no.		
1	Major Farming system/enterprise	Mushroom, Pisciculture, Dairy, Goatery,
		Backyard poultry.Rice-Pulses, Rice-
		Vegetables, Rice-Oilseeds

7	Production of major livestock products like milk, egg,	Meat- 30qtl, Egg-20000
	meat etc.	

2.b. Details of operational area / villages (2021)

Sl. No.	Name of Taluk	Name of the block	Name of the villages	Major crops & enterprises	Major problems identified (cropwise)	Identified Thrust Areas
1	Tileiba ni	Tileibani	Kalchipada dihi	Rice, Tomato, seasonal vegetables, Goatery	Acidic soil, imbalance fertilizer application, pest and diseases	Acid soil management, crop diversification, off- season vegetables cultivation, INM, IPM
2	Tileiba ni	Tileibani	Kailash	Rice, Sunflower, Mushroom, Goatery, pisciculture, poultry	Acidic soil, imbalance fertilizer application, pest and diseases	Acid soil management, crop diversification, off- season vegetables cultivation, INM, IPM
3	Tileiba ni	Tileibani	kurod	Rice, vegetables, pulses	Acidic soil, imbalance fertilizer application, pest and diseases	Acid soil management, crop diversification, off- season vegetables cultivation, INM, IPM
4	Reamal	Reamal	Kirtanpali	Rice, Vegetables, Apiculture, Pisciculture, Mushroom	Acidic soil, imbalance fertilizer application, pest and diseases	Acid soil management, crop diversification, off- season vegetables cultivation, INM, IPM
5	Barkot e	Barkote	Jhumpura	Rice, Pulses, Vegetables, Fruits	Acidic soil, imbalance fertilizer application, pest and diseases	Acid soil management, crop diversification, off- season vegetables cultivation, INM, IPM

2. c. Details of village adoption programme:

Name of the villages adopted by PC and SMS (2021) for its development and action plan

Name of village	Block	Action taken for development
Kalchipada Dihi	Tileibani	1. Application of different micronutrients, biofertiliser and staking
		technologies in tomato.
		2. Use of different wilt tolerant tomato varieties in late kharif season.
		3. Drip system in sweet potato cultivation.
Kailash	Tileibani	1. Mushroom cultivation throughout the year(Paddy straw and oyster)
		2. Introduction of new poultry breed Kadaknath and Asli.
		3.FLD programme on ginger cultivation where new variety Subhada
		introduced.
		4.CFLD Programme on mustard cultivation.
Kurod	Tileibani	1. STB application of fertilizer including micronutrients in medium land
		rice.
		2. STB application of fertilizer including micronutrients, weed
		management in medium and
		low land rice.
		3. OFT Programme on sweet potato cultivation.
		4. FLD on spine gourd cultivation.
Kirtanpalli	Reamal	1.Trellies system in bittergourd introduced.
		2. New rice variety swarnashreya introduced.
		3. Paddy straw and Oyster mushroom cultivation round the year.
		4. Training programme on beekeeping was conducted and 5 honeybee
		boxes were installed in the village.
		4. CFLD programme on pulse and oilseed was taken for development.
		5. OFT on sweet potato cultivation.
Deojharan	Barkote	1. Watermelon and pumpkin seeds provided under SCSP programme.
		2. Spine gourd cultivation in trellies.

2.1 Priority thrust areas

	Tiority till ust areas
S. No	Thrust area
1.	Yield enhancement of cereals, pulses, oilseeds, fruit & vegetable crops through improved crop
	management strategies
2.	Popularize diversified cropping pattern in upland & medium land situation
3.	Promote INM & IPM modules in different crops
4.	Economic empowerment of farm women through alternate income generating activities
5.	Emphasize on increasing productivity of fruits like Mango, Banana, Citrus & Litchi
6.	Promote cultivation of off season & exotic vegetables (Non-traditional) for higher income
7.	Agro based income generation activities to rural youths and farm women
8.	Strengthening of marketing channels
9.	Need based IFS models for small farm holders

3. <u>TECHNICAL ACHIEVEMENTS</u>

3.A. Details of target and achievement of mandatory activities by KVK during the year

1 Achievements on technologies assessed and refined

OFT-1

1.	Title of On Farm Trial	Assessment of PGR application for regular bearing in Mango
2.	Problem diagnosed	Low income due to irregular bearing.
3.	Details of technologies selected for assessment/refinement	TO1 : Application of Paclobutrazol @ 3.2ml/ meter canopy diameter through soil
	(Mention either Assessed or Refined)	drenching during September for non-bearing trees during first fortnight of
		September will induce flowering and fruit set yield during off years.
		TO2 :Application of total 5 sprays of ethephon 200ppm, 1st spray in Mid October
		and subsequent sprays in fortnightly interval to control alternate bearing in Mango.
4.	Source of Technology (ICAR/ AICRP/SAU/other, please specify)	Source: IIHR Annual Report 2017-18.
5.	Production system and thematic area	Integrated crop management.
6.	Performance of the Technology with performance	Cost of intervention. Additional income over additional investment Yield (q/ha),
	indicators	B:C ratio
7.	Final recommendation for micro level situation	Final recommendation can't be given as it requires more research.
8.	Constraints identified and feedback for research	As the year was (on year) in mango so no such significant difference was found in
		yield ,so it requires more research.
9.	Process of farmers participation and their reaction	As the year was (on year) in mango so no such significant difference was found in
		yield
1		

Thematic area: Integrated crop management.

Problem definition: Low income due to irregular bearing

Technology assessed: Assessment of different PGR application for regular bearing in Mango

Result

Table: 1

Technology option	No. of trials	Yie	eld componen	t	Yield	Cost of		Net return	BC
	triais	No of flowering shoots	Fruit set/panicle		(q/ha)	cultivation(Rs./ ha)	(Rs/ha)	(Rs./ha)	ratio

OFT-2

1.	Title of On Farm Trial	Assessment of IPM module against shoot gall psylla in mango.
2.	Problem diagnosed	Lack of conviction on timing of pesticide application.
3.	Details of technologies selected for	FP- No use of pesticides due to not aware about the pest and time of infestation
	assessment/refinement	TO ₁ -Pruning of egg bearing leaves during march last week and pruning of shoots upto 30cm
	(Mention either Assessed or Refined)	which bears gall during September
		TO ₂ -Spray Profenophos 50% EC and Dimethoate 30% EC @ 2ml/lit during middle of
		Augus
4.	Source of Technology (ICAR/ AICRP/SAU/other,	Annual Report ICAR-CISH, 2016
	please specify)	
5.	Production system and thematic area	Integrated pest management.
6.	Performance of the Technology with performance	% infestation, Cost of intervention. Additional income over additional investment Yield
	indicators	(q/ha), B:C ratio,
7.	Final recommendation for micro level situation	Timely application insecticides and other cultural practices
8.	Constraints identified and feedback for research	Infestation occurs during August to September but gall appear during flowering. Hence, it is
		difficult to control without studying the insect biolgy.
9.	Process of farmers participation and their reaction	Farmers are satisfied with the performance of the technology but psylla infestation was very
		less as compared to previous years.

Thematic area: Integrated pest management.

Problem definition: Lack of conviction on timing of pesticide application

Technology assessed: Assessment of IPM module against shoot gall psylla in mango.

Result

Table-2

Technology	No. of	Yield component			Disease/ insect	Yield(q	Cost of	Gross	Net return	BC

OFT-3

1.	Title of On Farm Trial	Assessment of long duration High yielding rice variety in kharif.
2.	Problem diagnosed	Low yield in existing old long duration variety for proximity to various pest and
		diseases
3.	Details of technologies selected for assessment/refinement	TO ₁ : Mrunalini : Small bold grains, Semi dwarf, Maturity-146days, Moderately
	(Mention either Assessed or Refined)	resistant to blast, sheath blight, sheath rot, Resistance to gall midge, yellow stem
		borer, leaf folder, resistance to lodging
		TO ₂ : Pradhandhan (CR Dhan 409) shallow lowlands of Odisha state, Maturity-
		160 days. Semi dwarf, non-lodging plant type, height -120-130cm, long slender
		grain, 350-400 panicles per m ² , high tillering (12-15), test weight of 22.5g,
		moderate submergence tolerance, moderately resistant to leaf blast, neck blast,
		sheath blight, sheath rot, yellow stem borer.

4.	Source of Technology (ICAR/ AICRP/SAU/other, please	Source: NRRI Annual Report,2014-15.
	specify)	
5.	Production system and thematic area	Varietal evaluation
6.	Performance of the Technology with performance	Cost of intervention. Additional income over additional investment Yield (q/ha),
	indicators	B:C ratio.
7.	Final recommendation for micro level situation	Mrunalini is recommended to the farmers as it is same duration (145 days) to pooja variety
		and giving higher yield
8.	Constraints identified and feedback for research	Pradhan Dhan is prone to lodging
9.	Process of farmers participation and their reaction	Farmers are satisfied with the yield of both the new varieties. But the duration of Pradhan
		Dhan is longer and prone to lodging which discourage them.

Thematic area: Varietal evaluation.

Problem definition: Low yield in existing old long duration variety for proximity to various pest and diseases

Technology assessed: Assessment of long duration High yielding rice variety in kharif.

Result

Table: 3

Technology	No. of	Yield component			Yield(q/ha)		Gross return		BC
option	trials	No. of effective tillers/hill	No. of spikelet per panicle	Test wt. (100 grain wt.)		cultivation(Rs ./ha)	(Rs/ha)	(Rs./ha)	ratio

OFT-4

1.	Title of On Farm Trial	Assessment of sweet potato varieties for Deogarh District.					
2.	Problem diagnosed	Low yield from local varieties					
3.	Details of technologies selected for assessment/refinement (Mention either Assessed or Refined)	TO1:Cultivation of Orange fleshed sweet potato var. ST-14, (Bhu Sona)					
		TO2:Cultivation of Purple fleshed sweet potato var. ST-13 (Bhu Krishna)					
4.	Source of Technology (ICAR/ AICRP/SAU/other, please specify)	Annual Report,2018-2019, CTCRI, Bhubaneswar					
5.	Production system and thematic area	Varietal evaluation					
6.	Performance of the Technology with performance indicators	Days to maturity, Tuber weight(g), Tuber yield per plant					
7.	Final recommendation for micro level situation	Bhu sona is recommended as it is quite similar to nali kandamula but lesser sweet					
8.	Constraints identified and feedback for research	Tuber size was not upto the mark.					
9.	Process of farmers participation and their reaction	Bhu Krishna is less preferred by farmers for its colour and taste.					

Thematic area: Varietal evaluation

Problem definition: Low yield from local varieties

Technology assessed: Assessment of sweet potato varieties for Deogarh District

OFT- 6

1.	Title of On Farm Trial	Assessment of fruit sucking moth management in sweet orange
2.	Problem diagnosed	Fruit sucking moth causes fruit drop at colour breaking stage
3.	Details of technologies selected for	FP- Fire in every evening hour in orchard which fails to control the population of
	assessment/refinement	the moths
	(Mention either Assessed or Refined)	TO ₁₋ Removal of alternate host, installation of light trap @1 no./acre and poison
		bait with fumigation during evening hour, foliar application of neem oil (1%) at 10
		days interval at coinciding with colour breaking stage of fruits.
		TO ₂ - Hanging of polypropylene sachets with Acephate 75% SP 10g @ 2 nos./tree
		coinciding with colour breaking stage
4.	Source of Technology (ICAR/ AICRP/SAU/other, please	TO ₁₋ Annual Report, ICAR-NRCC, 2016
	specify)	TO ₂ - ICAR-CCRI, 2018
5.	Production system and thematic area	Integrated Pest Management

6.	Performance of the Technology with performance	TO ₁ -Removal of alternate host arrest pest population, light trap & poison bait
	indicators	attract the moth, fumigation & spraying repel the moth colour breaking stage of
		fruits
		TO ₂ -Hanging polypropylene sachets with Acephate 75% SP act as a repellent of
		moth to the orchard.
7.	Final recommendation for micro level situation	Timely installation of poison bait, traps and other cultural practices
8.	Constraints identified and feedback for research	Infestation occurs during colour breaking stage of fruits, nocturnal in nature and
		having several alternate hosts. Hence, it is difficult to control without studying the
		insect biolgy.
9.	Process of farmers participation and their reaction	Farmers are satisfied with the performance of the technology but psylla infestation
		was very less as compared to previous years.

Thematic area:

Problem definition: Fruit sucking moth causes fruit drop at colour breaking stage.

Technology assessed: FP- Fire in every evening hour in orchard which fails to control the population of the moths

TO₁- Removal of alternate host, installation of light trap @1 no./acre and poison bait with fumigation during evening hour, foliar application of neem oil (1%) at 10 days interval at coinciding with colour breaking stage of fruits.

TO₂- Hanging of polypropylene sachets with Acephate 75% SP 10g @ 2 nos./tree coinciding with colour breaking stage

Technical Feedback on the demonstrated technologies

Sl. No	Crop	Feed Back
1	Greengram	Early sowing in green gram resulted better yield performance.
2	Rice	Hasanta var. rice effectively controlled BPH infestation.
3	Tomato	Farmers are satisfied with the quality and yield of varieties Arka Rakshak and Arka Samrat.
1	Bittergourd	More yield in trellis system compare to the traditional system
7	Dittergourd	· · · · · · · · · · · · · · · · · · ·
5	Onion	Agrifound dark red gave higher yield potential compared to local varieties.
6	Cauliflower	AMC application in cauliflower improved curd size and diameter.

Extension and Training activities under FLD

Sl. No.	Activity	Date	No. of activities organized	Number of participants	Remarks
1.	Field days	12.01.21 & 09.02.21	2	100	
2.	Farmers Training	14.1.21, 05.02.21, 08.04.21, 20.05.21 & 17.06.21	5	150	
3.	Media coverage	05.12.21, 16.10.21 & 07.09.21	5	450	
4.	Training for extension functionaries	18.08.21, 23.09.21,11.10.21 & 09.12.21	4	40	

Performance of the demonstration under CFLD on Pulse and Oilseed Crops during Kharif2021 and Rabi 2021-2022:

1. CFLD on Pulses during Rabi 2021-2022

(B) Details of HRD programmes undergone by KVK personnel:

Sl.	Name o	of Name of course	Name of KVK personnel	Date and Duration	Organized by
No.	programme		and designation		
1.					

3.7. Success stories/Case studies, if any (two or three pages write-up on 1-2best case(s) with suitable action photographs)

Name of farmer	Sri Narayana Dehury	
Address	Village- Vejikudar, Block-Reamal, Dist-Deogarh	
Contact details (Phone, mobile, email Id)	9937913770	
Landholding (in ha.)	2.0	
Name and description of the farm/ enterprise	Pond based farming system	
Economic impact	Net annual income-3,00,000/-	
Social impact	Climate resilient farmer	
Environmental impact	Improves soil quality	
Horizontal/ Vertical spread	15 ha	

3.8. Give details of innovative methodology or innovative technology of Transfer of Technology developed and used during the year

Sl. No.	Name/ Title of the technology	Name/ Details of the Innovator(s)	Brief details of the Innovative Technology
1	Deogarh farmer inspires other villagers	Sri Narayan Dehury	Sri Narayan Dehury, Village- Vegikudar, Block-Reamal of deogarh district, aged-65 has become a source of inspiration and has given a ray of hope to other villagers. The primary means of his earning is integrated farming. He has adopted a self sufficient farming strategy keeping in view the problems and challenges rising out of climate change in the field of agriculture now a days. He has been able to compensate the losses incurred due to failed crops by cultivating another crop or taking up some other profitable farming. Using scientific methods, Dehury cultivates paddy on 3 acres of his 5 acres farm land and earns upto 48000/per annum. Just after the kharif paddy harvest he grows mustard in 2 acres, which is otherwise known as rice-mustard cropping system. He has also taken up fish farming in 2 ponds dug on 1n

acre of land. Annually he catches up to 10 quintals of fish and
earns about Rs 80000/ He also rears Vanaraja and Kadaknath
poultry and earns 15,000 out of it. He earns 40000 anually from
milk production. Taking advice of KVK he has bought an egg
incubator and supplies kadaknath chicks to people. He has also
kept 80 nos of ducks, which is meant for egg and meat
production. In this way he compensates losses from one crop and
earns Rs 300000/- annually.

3.9. a. Give details of indigenous technology practiced by the farmers in the KVK operational area which can be considered for technology development (in detail with suitable photographs)

Sl. No.	Crop / Enterprise	ITK Practiced	Purpose of ITK
1	Nursery management	Spreading neem leaves over nursery	To control termite damage

b. Give details of organic farming practiced by the farmer

Sl. No.	Crop / Enterprise	Area (ha)/ No. covered	Production	No. of farmers involved	Market available (Y/N)
1	Sesamum, mango	28.5 ha	350 q	45	Y

3.10. Indicate the specific training need analysis tools/methodology followed by KVKs

Sl. No.	Brief details of the tool/ methodology followed	Purpose for which the tool was followed
1	A	T 1
1.	Assessment of training needs	To reduce gap
2.	Group contact methods	To identify problems.
3.	Small group techniques	To teach new technologies
4.	Mass contact method	Awareness
5	Extension teaching methods	Public awareness

3.11. a. Details of equipment available in Soil and Water Testing Laboratory

Sl. No	Name of the Equipment	Qty.
1	Shaker	1

Soil test campaign	1	20	Soil testing

3.14. RAWE/ FET programme - is KVK involved? (Y/N)

No of student trained	No of days stayed
9	-

ARS trainees trained	No of days stayed
-	-

3.15. List of VIP visitors (Minister/ MP/MLA/DM/VC/Zila Sabhadipati/Other Head of Organization/Foreigners)

Date	Name of the person	Purpose of visit
01.12.2021	Prof. P.J.Mishra, DEE,OUAT,BBSR, Dr. M.P.Nayak, JD(Info)	SAC Meeting
05.12.2021	Smt. Sudhamayee Patel, Zilla Parishad, President	World soil day
16.12.2021	Sri Lukas Padhan, PD,DRDA,Deogarh	To visit KVK farm.

4. IMPACT

4.1. Impact of KVK activities (Not to be restricted for reporting period).

Name of specific	No. of	% of adoption	Change in income (Rs.)	
technology/skill transferred	participants		Before (Rs./Unit)	After (Rs./Unit)
Use of different tomato varieties with consumer preference for wilt tolerance in late kharif	72	80	45,000/-/ha	1,30,000/-/ha

4.2. Cases of large scale adoption

(Please furnish detailed information for each case)

Horizontal spread of technologies		
Technology	Horizontal spread	
Trellis system in bitter gourd to check production of poor quality fruits due to soil contact	30 ha	
Herbicide application in kharif groundnut	110 ha	
Trellies system in tomato	150 ha	

4.3. Details of impact analysis of KVK activities carried out during the reporting period

Sl. No.	Brief details of technology	Impact of the technology in subjective terms	Impact of the technology in objective terms
1	Kharif tomato popularisation	Large scale adoption	75% villagers of Kalchipadadihi adopted
2	IPM in pigeonpea cultivation	Large scale adoption	35% villagers of FLD beneficiaries adopted IPM technology against pod borer

4.4. Details of innovations recorded by the KVK

Thematic area	Integrated crop management
Name of the Innovation	Trellies system in tomato
Details of Innovator	Pradeep Lakra, Village- Kalchipodadihi, Block-Tileibani, District-
	Deogarh
Back ground of innovation	He is practicing different types of trellies system in tomato since last
	2 years.
Technology details	Trellis should be of approximately 6 feet high with a top & bottom
	wire and plastic twine tied between the two wires at each plant.
	Posts should be no more than 15 feet apart and the top wire should
	be very tight. A stiff additional wire between posts may be required
	in the season when the fruit loads becomes heavy
Practical utility of innovation	For better quality of fruits.

4.5. Details of entrepreneurship development

Entrepreneurship development			
Name of the enterprise	Poultry and duckery		
Name & complete address of the	Sri Narayan Dehury, Village- vegikudar, Block-Reamal, Dist-		
entrepreneur	Deogarh		
Role of KVK with quantitative data support:	Providing kadaknath breeds(30 nos.), Ducks(Khaki campbell-50 nos)		
Timeline of the entrepreneurship development	Since last 5 years		
Technical Components of the Enterprise	farm pond, poultry, dairy, incubator		
Status of entrepreneur before and after the enterprise	Annual income before entrepreneur 1,00,000/-, after entrepreneur 3,00,000/-		
Present working condition of enterprise in terms of raw materials availability, labour availability, consumer preference, marketing the product etc. (Economic viability of the enterprise):	Available of raw materials, no problem in marketing of the produce		
Horizontal spread of enterprise	2 nos.		

4.6. Any other initiative taken by the KVK

- 1. Swachha grama Kirtanapalli
- 2. Mushroom village Kailash

5. LINKAGES

5.1. Functional linkage with different organizations

Name of organization	Nature of linkage
Agriculture	Field & Diagnostic visit, Field Day, Training, Demonstration &
	Dissemination of technology.
Horticulture & Fisheries	Field & Diagnostic visit, Field Day, Training, Demonstration,
	Dissemination of technology.
Veterinary	Dissemination of technology, Training, Poultry, Goatery
NABARD	FPO formation, WADI project and capacity building training

5.2. List of special programmes undertaken during 2021by the KVK, which have been financed by ATMA/Central Govt/ State Govt./NABARD/NHM/NFDB/Other Agencies (information of previous years should not be provided)

a) Programmes for infrastructure development

Name of the programme/scheme	Purpose of programme	Date/ Month of initiation	Funding agency	Amount (Rs.)
Seed production programme	Seed Production	December	ATMA	31,767

(b) Programme for other activities (training, FLD,OFT, Mela, Exhibition etc.)

Name of the programme/scheme	Purpose of programme	Date/ Month of initiation	Funding agency	Amount (Rs.)

6. PERFORMANCE OF INFRASTRUCTURE IN KVK

6.1. Performance of demonstration units (other than instructional farm)
